INTRODUCTION	

# 1. Introduction

## 1.1. Document Purpose

The purpose of the Excise Global and Interaction BPM Report is to reflect the information shown in the Excise Global BPM and the L2 Interaction BPMs and will provide further explanation to the reader on how to interpret these BPMs.

## 1.2. Scope

The Excise Global BPM overview is limited to the scope of the Excise business domain. The Excise Global BPM provides an overview of all Excise business domains and how those business domains interact with each other.

The L1 Excise Global BPM and the L2 Excise Interaction BPMs are hierarchically linked to each other. This relationship as well as the relationship with other models in ARIS is explained in the Levelling Guidelines [R01].

## 1.3. Deviation From TEMPO

The following TEMPO sections are not part of this document:

- Sign Off list;
- Distribution List;
- Glossary of Terms;
- Applicable Documents.

The following TEMPO sections are added to this document:

- Project Ownership;
- Intended Audience.

## 1.4. Assumption and Constraints

The reader should have a basic knowledge of the Levelling guidelines [R01].

## 1.5. Project Ownership

The unit DG TAXUD/C2 is the project owner of the Excise Global BPM.

## 1.6. Intended Audience

The intended audience for this document includes:

- Any person of DG TAXUD business and legal units working in the Excise Business Domain;
- Any person of the development team of DG TAXUD/C5 who will use this document as a reference during the development cycle;
- Any person from the DG TAXUD units who has to verify whether the current document is consistent with the applicable documents and depicts the solution to be followed;
- Any person from the Member State Administration (MSA) or Trade representatives who have to identify the actions, implications and consequences on their National Domain, including both business people and people having an IT background.

## 1.7. Structure of the Document

This document is split into the following chapters:

EU Customs Global and Interaction BPM Report	REF: EU Customs Global and Interaction BPM Report for Excise
EU Customs Global and Interaction BPM Report	
INTRODUCTION	

- Chapter 1 "Introduction" includes the document Purpose, Scope, Deviations from TEMPO, Assumptions and Constraints, Project ownership and Intended audience;
- Chapter 2 "References" includes acronyms, abbreviations and reference documents;
- Chapter 3 "Document History" provides the history of the report;
- Chapter 4 "L1 Excise Global BPM" represents an overview of the Excise business domains;
- Chapter 5 "L2 Excise Interaction BPMs for Core business domains";
- Chapter 6 "L2 Excise Interaction BPMs for Enabling business domains";
- Chapter 7 "L1 Excise Global BPM Matrix".

## 4. L1 Excise Global BPM

### 4.1. Model Type Description

The L1 Global BPM for Excise is grouped into two types of business domains; one group containing the Core business domains and a second group containing the Enabling business domains. The Core business domains group consists of Core business domains that are directly related to the movement of goods, the Enabling business domains group consists of Enabling business domains that facilitate the Core business domains. This implies an enabling process delivers output that can be used by a core process to effectively execute the process.

In addition a Global Business Data group is added on the L1 Excise Global BPM. Those Global Business Data show the data that can be exchanged between Excise business domains. This interaction between enabling and core processes via Global Business Data is shown on the L2 Excise Interaction BPMs.

### 4.3. Business Domains

Domain Name	Domain Description
User Access Management	This Enabling Business Domain encapsulates the processes necessary to ensure that authenticated users have access to the right set of functionality and data. User Access Management applies at (1) central level, for the purposes of accessing the Central Applications over CCN; and (2) at national level, for the purposes of accessing the National Applications (such as, setting up user accounts/profiles) in accordance with the National Administration access policy.
Registration and Authorisation Data Management	<p>This Enabling Business Domain encapsulates all processes related to the management of the necessary Registration and Authorisation data (concerning all economic operators, tax warehouses and temporary authorisations of the Member States) for the effective execution of the processes in the Core Business Domains (excluding the Customs Supporting Procedures*). (Typically, these are the processes related to the submission, validation and acceptance of Excise documents.) In addition, this Enabling Business Domain includes the processes related to the consultation of the Registration and Authorisation data by the economic operators.</p> <p>(*It shall be noted that in the context of Excise, Registration and Authorisation Data Management does not concern the Customs Supporting Procedures.)</p>
Customs Office List (COL) Management	<p>This Enabling Business Domain encapsulates all processes related to the management of the necessary list of offices of Member State Administrations for the effective execution of the processes within the Core Business Domains (excluding the Customs Supporting Procedures*). (Typically, these are the processes related to the submission, validation and acceptance of Excise documents or Administrative Co-operation documents with respect to the responsible and communicating Excise Offices, respectively.)</p> <p>(*It shall be noted that in the context of Excise, Customs Office List (COL) Management does not concern the Customs Supporting Procedures.)</p>
Statistics Management	This Enabling Business Domain encapsulates all processes related to the production and maintenance of the business statistics necessary to monitor the effective and efficient execution of the excise operations amongst the Member State Administrations.
Duty Suspension	This Core Business Domain encapsulates all processes that make up the business life cycle of an excise movement under duty suspension arrangements.
Distance Selling	<p>This Core Business Domain encapsulates all processes for distance selling (Business to Customer selling) of excise goods.</p> <p>More specifically, distance selling in Excise means the intra-EU movement of excise goods:</p>

EU Customs Global and Interaction BPM Report	REF: EU Customs Global and Interaction BPM Report for Excise
EU Customs Global and Interaction BPM Report	
L1 EXCISE GLOBAL BPM	

	<ul style="list-style-type: none"> <li>- which have been released for consumption in one Member State and for which the excise duty has already been paid in that Member State, and</li> <li>- which are sold and delivered (by the vendor or on his behalf) to private individuals established in another Member State where the excise duty becomes due.</li> </ul> <p>When proper evidence is provided that the excise duty has been paid in the Member State of destination, the excise duty can be reimbursed in the Member State of dispatch (where the goods have first been released for consumption and where the excise duty was first paid).</p> <p>A typical example of distance selling in Excise is the selling of excise goods through the Internet.</p>
Administrative Cooperation	This Core Business Domain encapsulates all processes enabling MSAs to (1) control the holding and movement of goods under duty suspension arrangements, and (2) verify the movement of goods subject to excise duty after their release for consumption.
Warehouse Management	This Core Business Domain encapsulates all processes necessary to control and optimise the storage of excise goods in a Trader warehouse for the purposes of efficient supply chain management.
Duty Paid B2B	This Core Business Domain encapsulates all processes that make up the business life cycle of excise movements under the Duty Paid Business to Business regime.
Reference Data Management	<p>This Enabling Business Domain encapsulates all processes related to the management of the necessary Reference Data (i.e., the common system parameters and the list of business codes) for the effective execution of the processes within the Core Business Domains (excluding the Customs Supporting Procedures*). (Typically, these are the processes related to the submission, validation and acceptance of Excise documents.)</p> <p>(*It shall be noted that in the context of Excise, Reference Data Management does not concern the Customs Supporting Procedures.)</p>
Exemptions Management	<p>This Enabling Business Domain encapsulates all processes related to the management of the necessary Exemptions Data (such as, the Exemption Certificates) for the effective execution of the processes within the Core Business Domains (excluding the Customs Supporting Procedures*). (Typically, these are the processes related to the submission, validation and acceptance of Excise documents.)</p> <p>(*It shall be noted that in the context of Excise, Exemptions Management does not concern the Customs Supporting Procedures.)</p>
Import (Customs)	This Core Business Domain encapsulates all processes related to the placing of goods under the Import procedure. This customs procedure concerns the importation of goods enter into free circulation in the European Union territory upon the payment of any import duties and taxes chargeable (or provision of guarantee) and the accomplishment of all the

EU Customs Global and Interaction BPM Report	REF: EU Customs Global and Interaction BPM Report for Excise
EU Customs Global and Interaction BPM Report	
L1 EXCISE GLOBAL BPM	

	necessary customs formalities.
Availability Management	<p>This Enabling Business Domain encapsulates the processes necessary to sustain the availability of the operations in the Core Business Domains (excluding the Customs Supporting Procedures*) by all stakeholders within the agreed levels.</p> <p>(*It shall be noted that in the context of Excise, Availability Management does not concern the Customs Supporting Procedures.)</p>
Risk Management	<p>This Enabling Business Domain encapsulates all processes related to risk management (i.e., to the identification, assessment, and prioritisation of risks) aiming at detecting potentially fraudulent movements, hence resulting in targeted controls.</p>
Guarantee Management	<p>This Enabling Business Domain encapsulates the guarantee management processes necessary to assure the proper handling of guarantees (such as, lodging and release of guarantees) throughout the execution of the processes within the Core Business Domains (excluding the Customs Supporting Procedures*).</p> <p>In accordance with the legislation (Art.34 2008/118/EC) the arrangements for guarantees and payment are specified, whereas for duty suspension (Art.18 and part of 19 2008/118/EC), the arrangements are left up to Member State.</p> <p>(*It shall be noted that in the context of Excise, Guarantee Management does not concern the Customs Supporting Procedures.)</p>
Export (Customs)	<p>This Core Business Domain encapsulates all processes for the European Union goods destined to leave the customs territory of the European Union and placed under the Export procedure. This Core Business Domain also includes certification of the exit of goods.</p>
Business Continuity Management	<p>This Enabling Business Domain encapsulates the processes necessary to assure:</p> <p>(1) fallback, namely that business continuity can be achieved with no electronic means, when IT services are not available, and</p> <p>(2) recovery, namely that IT services can recover and continue even after a serious incident occurs.</p> <p>Business Continuity Management includes not only reactive measures, but also proactive measures – reducing the risk of a disaster in the first instance.</p>

Table 4.1: Business Domains

## 4.4. Data

Data Cluster	Definition
Business Continuity Data	All data concerning fallback and recovery (such as, fallback ARCs).
Excise Duty Paid B2B Movement Data	All data that makes up an excise movement entity under the Duty Paid regime. That is, all information (functional messages) exchanged for a given excise movement under the Duty Paid B2B regime.
Reference Data	The common system parameters and the list of business codes.
Customs Data	All data exchanged in the context of the Customs Supporting Procedures (Export data, Import data and Transit data).
Guarantee Data	All data relevant to guarantees, as defined at both Common level (such as, the Guarantor Type Code) and at national level (such as, guarantee types, guarantee status, Guarantee Reference Number, etc).
Warehouse Management Data	All data concerning the storage of excise goods in Trader warehouses (such as, inventory levels, stock locations, length of storage time, demand peak seasons, etc.)
COL (including EOL)	The list of offices of Member State Administrations, including the Excise offices.
User Access Data	All data concerning authentication and authorisation - functionality and information access control (such as, user identification, user groups, etc).
Availability Information	All data concerning the (un-)availability of the operations in the Core Business Domains (such as, (un-)availability levels, availability downtime periods, affected processes, etc).
Excise other Duty Paid Movement Data	All data that makes up an excise movement entity under the Duty Paid regimes, other than Duty Paid B2B.
Registration and Authorisation Data	The Registration and Authorisation data concerning all economic operators, tax warehouses and temporary authorisations of the Member States.
Risk Data	All data that defines the risk of an excise movement (such as, risk assessment, risk profile, risk prioritisation, risk classification, etc).
Exemptions Data	All data concerning the consignees exempted from the payment of excise duties in accordance with Article 12 of Directive 2008/118/EC (such as, the Exemption Certificates).
Distance Selling Movement Data	All data that makes up an excise movement entity under the Distance Selling regime. That is, all information exchanged for a given excise movement under the Distance Selling regime.
Supporting Documents	Any type of document that might be exchanged in the course of an Excise movement and is comprehensive to the movement data (such as, potential wine origin certificates and other certificates, Administrative Co-operation documents, etc).
Statistics Data	All data that is part of the business statistics that are used to monitor the effective and efficient execution of the excise operations amongst the Member State Administrations.
Excise Duty Suspension Movement Data	All data that makes up an excise movement entity under the Duty Suspension regime. That is, all information (functional messages)

EU Customs Global and Interaction BPM Report	REF: EU Customs Global and Interaction BPM Report for Excise
EU Customs Global and Interaction BPM Report	
L1 EXCISE GLOBAL BPM	

	exchanged for a given excise movement under the Duty Suspension regime.
Administrative Cooperation Information/ Results	All data exchanged in the context of Administrative co-operation and follow-up (control/events/interruption).

Table 4.2: Data

EU Customs Global and Interaction BPM Report	REF: EU Customs Global and Interaction BPM Report for Excise

L2 EXCISE INTERACTION BPMS FOR CORE PROCESSES	

## 5. L2 Excise Interaction BPMs for Core Processes

### 5.1. Model Type Description

The purpose of the L2 Excise Interaction BPM for Core business domains is to show all interactions of a main Core business domain. Those interactions are structured around 4 types of relationships:

- "Is Predecessor Of" between the previous business domain and the main business domain. This link indicates which Core business domain can happen before the execution of the main Core business domain from a procedural viewpoint;
- "Is Predecessor Of" between the main business domain and the subsequent business domain. This link indicates which Core business domain can happen after the execution of the main Core business domain from a procedural viewpoint;
- "Has Input For" between the Global Business Data and the main Core business domain. These links show the data outputs of the Enabling business domains that are used by the main Core business domain;
- "Has Output Of" between the main Core business domain and the Global Business Data. These links show which outcomes of the main Core business domain are used by the Enabling business domains.

EU Customs Global and Interaction BPM Report	
L2 EXCISE INTERACTION BPMS FOR ENABLING PROCESSES	

## 6. L2 Excise Interaction BPMs for Enabling Processes

### 6.1. Model Type Description

The purpose of the L2 Excise Interaction BPM for Enabling business domains is to show all interactions of a main Enabling business domain. Those interactions are structured around 2 types of relationships:

- "Has Input For" between the Global Business Data and the main Enabling business domain. This link shows the data outputs of the Enabling business domains that are used as an input to the main Enabling business domain;
- "Has Output Of" between the main Enabling business domain and the Global Business Data. This link shows which data outputs of the main Enabling business domain are used by the Enabling or Core business domains.
