1	30/06/2011	First operational version
2	31/08/2011	1. Correct bug: Include the required attribute "requestId" in the *processIncomingMessageResponse (MessageProcessorService)* 2. Improvement: In the *DateMovementRetrievalService*, if there are no messages in the indicated time period there will be no movement's information return. 3. Improvement: If a trader A uses *DateMovementRetrievalService or MovementRetrievalService* service, on behalf of trader B without the appropriated authorization, independently of the result (data or no data found), an error will be produced: *NotAuthorized* 4. Improvement: In the server side logging mechanism. No effect to the Web service user.
3	05/01/2011	1. Improvement: In *DateMovementRetrievalService or MovementRetrievalService* services to accept all replies message types in "messageType" element. 2. Enable ECS Domain (all services) in ICISnet testing Environment.
