* Difference in dates of ICS2 Release 2 go-live planning of Member States listed here and in the webpage of the UCC Work Programme is due to the fact that this overview covers only the processes relevant for the Economic Operators and not all ICS2 Release 2 functionalities.

** Go-live of the NES after 1 July 2023 does not affect the deployment of air carriers within the transition period established for them, i.e. 1 July 2023. For those Member States the ICS2 Business Continuity Plan will apply.
