

ANNEX 3: REQUIREMENTS

1. Functional Requirements

FUNCTIONAL REQUIREMENT ID	FUNCTIONAL REQUIREMENT NAME	FUNCTIONAL REQUIREMENT DESCRIPTION	FUNCTIONAL REQUIREMENT RELATED TEST	RELATED BUSINESS REQUIREMENT ID	RELATED BUSINESS REQUIREMENT NAME	RELATED BUSINESS REQUIREMENT DESCRIPTION
AES_FUR_0001	Validate Data	The AES must validate data against its associated Rules & Conditions, formats and required fields.	AES-TC-0101 AES-TC-0103 AES-TC-0111 AES-TC-0116 AES-TC-0118 AES-TC-0120 AES-TC-0121 AES-TC-0123 AES-TC-0301 AES-TC-0303 AES-TC-0402 AES-TC-0404 AES-TC-0405 AES-TC-0409 AES-TC-0410 AES-TC-0414 AES-TC-0420 AES-TC-0422 AES-TC-0423 AES-TC-0424 AES-TC-0424 AES-TC-0430 AES-TC-0431 AES-TC-0432 AES-TC-0435 AES-TC-0701 AES-TC-0702 AES-TC-0704 AES-TC-0705 AES-TC-0801 AES-TC-0805 AES-TC-0810 AES-TC-0814 AES-TC-0818 AES-TC-0819	EXP_BUS_0001	Receive Export Declaration	The Customs Officer must be able to receive export declaration.

Functional Requirements BPM Report	REF: SC10-QTM011-DLV-011-5.5-49-1-1
EU Customs Functional Requirements BPM Report for Automated Export System (AES)	
ANNEX 3: REQUIREMENTS	

			AES-TC-0821 AES-TC-1401 AES-TC-1402 AES-TC-1501 AES-TC-1503 AES-TC-1001 AES-TC-1003 AES-TC-1007 AES-TC-1008 AES-TC-1701 AES-TC-1702 AES-TC-1801 AES-TC-1803 AES-TC-2106 AES-TC-2107 AES-TC-2108			
				EXP_BUS_0005	Receive Amendment Request	The Customs Officer must be able to receive an amendment request to an export declaration / exit summary declaration / re-export notification.
				EXP_BUS_0007	Receive Supplementary Declaration	Customs Officer must be able to receive supplementary declaration and match it to the simplified declaration earlier received.
				EXP_BUS_0012	Receive Re-export Notification	The Customs Officer at the Customs Office of Exit must be able to receive the Re-export Notification.
				EXP_BUS_0014	Handle Exit Notification	The Customs Officer at the Customs Office of Exit must be able to process the exit notification.
				EXP_BUS_0022	Manage Arrival at Exit when AER/SAER Is Available Prior to Exit Notification	The Customs Officer at the Customs Office of Exit must be able to process the arrival of goods at exit provided that an Anticipated Export Record / Split Anticipated Export Record is available before the notification for arrival at exit from the Trader.
				EXP_BUS_0024	Manage Arrival at Exit when AER/SAER Is Not Available Prior to Exit Notification	When the notification from the Trader is received before the Anticipated Export Record or Split Anticipated Export Record is available at the Customs Office of Exit, the Customs Officer at the Customs Office of Exit must be able to process the arrival of the goods and request the Anticipated Export Record from the Customs Office of Export or the Split Anticipated Export Record from the Previous Customs Office of Exit.

Functional Requirements BPM Report	REF: SC10-QTM011-DLV-011-5.5-49-1-1
EU Customs Functional Requirements BPM Report for Automated Export System (AES)	
ANNEX 3: REQUIREMENTS	

				EXP_BUS_0026	Manage Exit Results	The Customs Officer at the Customs Office of Exit must be able to receive the Exit Notification form the Trader and to communicate the Exit Results to the Customs Office of Export.
				EXP_BUS_0027	Manage Alternative Evidence	The Customs Officer at the Customs Office of Export must be able to manage any alternative evidence about the exit of goods.
				EXP_BUS_0029	Collect Information about Movement of Goods from Trader	The Customs Officer at the Customs Office of Export must be able to collect additional information about the Movement of Goods from the Trader.
				EXP_BUS_0032	Manage Lodgement of EXS	The Customs Officer at the customs office where an Exist Summary Declaration is lodged must be able to accept and process the declaration.
				EXP_BUS_0034	Manage Arrival at Exit when EXS Has Not Been Received	The Customs Officer at the Customs Office of Exit must be able to process the Arrival at Exit when the Exit Summary Declaration data is not yet available by retrieving it from the Customs Office of Lodgement.
				EXP_BUS_0035	Manage EXS Registration at Office of Exit	The Customs Officer at the Customs Office of Exit must be able to process a directly lodged Exit Summary Declaration or an Exit Summary Declaration forwarded by the Customs Office of Lodgement.
				EXP_BUS_0060	Manage Presentation Notification for Entry in the Declarants Records	The Customs Authorities must verify the validity and consistency of information provided for Entry in the Declarants Records.
AES_FUR_0002	Record Data	The AES must record data as it is registered or processed automatically.	AES-TC-0101 AES-TC-0102 AES-TC-0103 AES-TC-0104 AES-TC-0105 AES-TC-0106 AES-TC-0108 AES-TC-0110 AES-TC-0111 AES-TC-0112 AES-TC-0113 AES-TC-0114 AES-TC-0115 AES-TC-0116 AES-TC-0117 AES-TC-0118 AES-TC-0119	EXP_BUS_0001	Receive Export Declaration	The Customs Officer must be able to receive export declaration.

ANNEX 3: REQUIREMENTS	

						at the Customs Office of Export.
				EXP_BUS_0004	Release or Not Release Goods for Export	The Customs Officer must be able to release or not release the goods for export, based on the control decision and control result.
				EXP_BUS_0005	Receive Amendment Request	The Customs Officer must be able to receive an amendment request to an export declaration / exit summary declaration / re-export notification.
				EXP_BUS_0007	Receive Supplementary Declaration	Customs Officer must be able to receive supplementary declaration and match it to the simplified declaration earlier received.
				EXP_BUS_0008	Receive Request for Anticipated Export Record	The Customs Office of Export must be able to receive an Anticipated Export Record request.
				EXP_BUS_0009	Forward Anticipated Export Record	The Customs Office of Export must be able to send/forward an Anticipated Export Record to: - the Declared Customs Office of Exit when the Anticipated Export Record has not been received properly, or - to the Actual Customs Office of Exit, when there was a diversion.
				EXP_BUS_0010	Receive Data Required for Certification of Exit	The Customs Officer at the Customs Office of Export must be able to receive the Arrival at Exit Notification and the Exit Results from the Customs Office of Exit. In case of Simplified Declaration, Exit must be certified after the Supplementary Declaration is available.
				EXP_BUS_0012	Receive Re-export Notification	The Customs Officer at the Customs Office of Exit must be able to receive the Re-export Notification.
				EXP_BUS_0013	Control Goods for Re-Export Notification	The Customs Officer at the Customs Office of Exit of Exit must be able to perform a risk analysis and if necessary perform controls on goods. The relevant communication with the Trader must be possible.
				EXP_BUS_0014	Handle Exit Notification	The Customs Officer at the Customs Office of Exit must be able to process the exit notification.
				EXP_BUS_0015	Release or Not Release Goods for Exit	The Customs Officer at the Customs Office of Exit must be able to release or not release the goods for exit, based on the control decision and the control result.
				EXP_BUS_0016	Process Information Query	The Requesting Customs Officer must be able to retrieve export movement data available either locally or at another Customs Office
				EXP_BUS_0017	Respond to Information Query	The Requested Customs Office must be able

Functional Requirements BPM Report	REF: SC10-QTM011-DLV-011-5.5-49-1-1

ANNEX 3: REQUIREMENTS	

						to respond to information queries regarding export movement data.
				EXP_BUS_0018	Control Goods for Centralised Clearance	The Customs Officer at the Presentation Customs Office must be able to complete the formalities concerning the control of goods.
				EXP_BUS_0019	Respond to Operation Status Check	The Requested Customs Officer must be able to process requests from another Customs Office about the status of an operation.
				EXP_BUS_0020	Request Operation Status Update	The Requesting Customs Officer must be able to request an update about the status of an operation from another Customs Office.
				EXP_BUS_0021	Update Operation Status	The Requesting Customs Officer must be able to update the status of an operation when an updated status is received from another Customs Office.
				EXP_BUS_0022	Manage Arrival at Exit when AER/SAER Is Available Prior to Exit Notification	The Customs Officer at the Customs Office of Exit must be able to process the arrival of goods at exit provided that an Anticipated Export Record / Split Anticipated Export Record is available before the notification for arrival at exit from the Trader.
				EXP_BUS_0023	Manage Forwarded Arrival Advice	The Customs Officer at the Customs Office of Exit must be able to manage a forwarded arrival advice.
				EXP_BUS_0024	Manage Arrival at Exit when AER/SAER Is Not Available Prior to Exit Notification	When the notification from the Trader is received before the Anticipated Export Record or Split Anticipated Export Record is available at the Customs Office of Exit, the Customs Officer at the Customs Office of Exit must be able to process the arrival of the goods and request the Anticipated Export Record from the Customs Office of Export or the Split Anticipated Export Record from the Previous Customs Office of Exit.
				EXP_BUS_0025	Control Goods at Office of Exit	The Customs Officer at the Customs Office of Exit must be able to perform documentary and/or physical controls over goods and to complete the necessary communication with other Customs Offices and the Trader.
				EXP_BUS_0026	Manage Exit Results	The Customs Officer at the Customs Office of Exit must be able to receive the Exit Notification form the Trader and to communicate the Exit Results to the Customs Office of Export.
				EXP_BUS_0027	Manage Alternative Evidence	The Customs Officer at the Customs Office of Export must be able to manage any alternative evidence about the exit of goods.
				EXP_BUS_0028	Initiate Enquiry Procedure	The Customs Officer at the Customs Office of

Functional Requirements BPM Report	REF: SC10-QTM011-DLV-011-5.5-49-1-1
EU Customs Functional Requirements BPM Report for Automated Export System (AES)	
ANNEX 3: REQUIREMENTS	

						Export must be able to initiate enquiry procedure, based on: - Customs Officer's decision, - Unavailability of exit results at the end of the time limit after release for export, or - Request for certification of exit from the trader when exit results are still not available.
				EXP_BUS_0029	Collect Information about Movement of Goods from Trader	The Customs Officer at the Customs Office of Export must be able to collect additional information about the Movement of Goods from the Trader.
				EXP_BUS_0030	Respond to Exit Results Request	The Customs Officer at Customs Office of Exit must be able to respond to a request for Exit Results from the Customs Office of Export.
				EXP_BUS_0031	Collect Exit Results from Office of Exit	The Customs Officer at the Customs Office of Export must be able to collect the Exit Results from the Customs Office of Exit.
				EXP_BUS_0032	Manage Lodgement of EXS	The Customs Officer at the customs office where an Exist Summary Declaration is lodged must be able to accept and process the declaration.
				EXP_BUS_0033	Respond to EXS Data Request	The Customs Officer at the Customs Office of Lodgement must be able to receive and respond to requests concerning Exit Summary Declaration data.
				EXP_BUS_0034	Manage Arrival at Exit when EXS Has Not Been Received	The Customs Officer at the Customs Office of Exit must be able to process the Arrival at Exit when the Exit Summary Declaration data is not yet available by retrieving it from the Customs Office of Lodgement.
				EXP_BUS_0035	Manage EXS Registration at Office of Exit	The Customs Officer at the Customs Office of Exit must be able to process a directly lodged Exit Summary Declaration or an Exit Summary Declaration forwarded by the Customs Office of Lodgement.
				EXP_BUS_0036	Receive Control Notification	The Customs Officer at the Customs Office where the Exit Summary Declaration has been lodged must be able to process the control notification received from the Customs Office of Exit.
				EXP_BUS_0037	Control Goods (EXS)	The Customs Officer at the Customs Office of Exit must be able to perform documentary and/or physical controls over goods and to complete the necessary communication with other Customs Offices and the Trader.
				EXP_BUS_0038	Manage Invalidation of Export Declaration	The Customs Officer must be able to invalidate the export declaration when it no

ANNEX 3: REQUIREMENTS	

						longer meets the requirements to be processed normally.
				EXP_BUS_0049	Fulfill Information Obligations Concerning other Authorities	The Presentation Customs Office must be able to fulfill its information obligations concerning other authorities, e.g. statistical information.
				EXP_BUS_0053	Manage Risk Analysis	The Customs Authorities must perform risk analysis according to specific rules.
				EXP_BUS_0055	Manage Customs Debt	The Customs Authorities must determine the duties, supervise payment of the duties, manage guarantees and manage the entering into the accounts.
				EXP_BUS_0057	Manage Documentary Controls	The Customs Authorities must examine the declaration and the supporting documents - the necessary particulars in the customs declaration and the availability and content of the supporting documents.
				EXP_BUS_0058	Manage Regularisation of Goods	The Customs Authorities must authorise the regularisation of the goods and manage the result of the regularisation.
				EXP_BUS_0059	Manage Control Plan for Entry in the Declarants Records	The Customs Authorities must check the control plan agreed amongst the customs offices concerned and apply, including risk analysis if control is advisable under the conditions at hand, under the authorisation of Entry in the Declarants Records.
				EXP_BUS_0060	Manage Presentation Notification for Entry in the Declarants Records	The Customs Authorities must verify the validity and consistency of information provided for Entry in the Declarants Records.
AES_FUR_0003	Accept Export Declaration	The AES of the Customs Office of Export must accept a customs declaration.	AES-TC-0101 AES-TC-0103 AES-TC-0116	EXP_BUS_0002	Accept or Reject Export Declaration	The Customs Officer must be able to accept or reject an Export Declaration.
AES_FUR_0004	Present Information/Data to the Customs Officer	The AES must present data to the customs officer.	AES-TC-0704 AES-TC-0705 AES-TC-1002 AES-TC-1005 AES-TC-1007 AES-TC-1014 AES-TC-1022 AES-TC-1205 AES-TC-1206 AES-TC-1207 AES-TC-1212 AES-TC-1215 AES-TC-1216	EXP_BUS_0007	Receive Supplementary Declaration	Customs Officer must be able to receive supplementary declaration and match it to the simplified declaration earlier received.

AES_FUR_101	Stop Timer to Receive Control Results	The AES at Supervising Customs Office must stop the timer to receive control results		EXP_BUS_0003	Control Goods at Office of Export	The Customs Officer must be able to complete the formalities concerning the control of goods at the Customs Office of Export.
				EXP_BUS_0018	Control Goods for Centralised Clearance	The Customs Officer at the Presentation Customs Office must be able to complete the formalities concerning the control of goods.
AES_FUR_102	Stop Timer to Receive Control Notification	The AES at Supervising Customs Office must stop the timer to receive control notification		EXP_BUS_0018	Control Goods for Centralised Clearance	The Customs Officer at the Presentation Customs Office must be able to complete the formalities concerning the control of goods.
AES_FUR_103	Identify if Exporter/Declarant must be Notified of Controls	The AES of the Customs Office of Export must identify if the exporter/declarant must be informed of		EXP_BUS_0002	Accept or Reject Export Declaration	The Customs Officer must be able to accept or reject an Export Declaration.

		the decided controls.				
EXP_FUR_0094	Calculate Expiry Date to Receive Export Presentation Notification	AES must be able to calculate the expiry date of the time limit to receive an Export Presentation Notification.		EXP_BUS_0002	Accept or Reject Export Declaration	The Customs Officer must be able to accept or reject an Export Declaration.
EXP_FUR_0095	Stop Timer to Receive Export Presentation Notification			EXP_BUS_0002	Accept or Reject Export Declaration	The Customs Officer must be able to accept or reject an Export Declaration.

Table 1: Functional Requirements

2. Non-Functional Requirements

2.1. Access Control and Connectivity Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_ACC_0001	Access Authentication	Every interaction with AES, must be under identification, authentication and authorisation control. – The identification establishes the user or IT system identity; – The authentication validates the user credentials; – The authorisation determines: which users or IT systems have access to what function; which users or IT systems have access to what data. The AES shall not allow a user to login by bypassing the identification and authentication procedures.	
AES_ACC_0002	Type of Users	The following type of users of the National AES, must be supported: – MS users and MS IT systems; - Optionally, Trade users can have access.	
AES_ACC_0003	CCN Access	The IEs between the Nationally implemented AES are sent over the CCN.	
AES_ACC_0004	External Access	The National AES might be accessible to external users and external IT systems, only through an additional security layer, for example provided by HTTP reverse proxies services.	
AES_ACC_0005	HTTP Proxy for Outbound HTTP Requests	The national AES must be capable of using HTTP proxy for outbound HTTP requests.	
AES_ACC_0006	Identical Behaviour	The behaviour of the AES must be identical whether direct or proxy connection exists between the client or IT system, and the CDCO, independently of the number of proxy or reverse proxy servers participating in the communication.	
AES_ACC_0007	Password	Password shall not be stored as a clear-text. OR Passwords shall only be stored as password hashes.	
AES_ACC_0008	Reverse Proxies	The TA must provide support for deploying into environments making use of HTTP reverse proxies. This includes such things as proper handling of absolute URLs (e.g. in redirects) and page expiration for dynamic content.	
AES_ACC_0009	Security Checks	The security checks and operations shall be distinguished from the business operations and logic. The security policy should be easily modified without affecting the business operations. The security policy consists of the security	

		measures related to identification, authentication and authorisation.	
AES_ACC_0010	Single Authentication	The national AES shall authenticate the users once and grant access for any subsequent business operations within the same session in a transparent manner (i.e. not requesting every time the user credentials).	

Table 2: Access Control and Connectivity Requirements

2.2. Audit Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_AUD_0001	Audit Trail of Data Changes	The AES must keep an audit trail of all data changes: what data was affected, the kind of changes (creation, update or deletion), who applied the changes and when. In case of an update, the initial and the new state of the changed data must also be recorded. In case of a delete, there is a difference between a regular deletion and a physical deletion. For physically deleted data, the audit trail shall only contain a limited set of data: the reference of the deleted record, who deleted it and when. For the regular deletion, the whole data record is audited. The auditing component must support both modes.	
AES_AUD_0002	Audit Trail Data Exchange Storage	The audit trail of all data exchanges over the CCN between the MS IT systems must be available for at least 5 years.	

Table 3: Audit Requirements

2.3. Availability Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_AVA_0001	Ability to Recover by Resubmitting Failed Request	The AES must guarantee at the presentation and web service layers the ability to recover by resubmitting the failed request by the end user, right after a failure.	
AES_AVA_0002	Application Deployment Rollback	The TA must provide means for application deployment rollback.	
AES_AVA_0003	Backup and Restore Procedures	The AES components must be capable of integrating with backup and restore procedures. The preferred solution is the current infrastructure provider backup/restore.	
AES_AVA_0004	Downtime during Deployment	Downtime during the deployment of the new application version must be minimal.	
AES_AVA_0005	Failure Containment	In case of the failure of one component the TA must minimise the effect on other components which are not directly related to the failed component (failure containment).	
AES_AVA_0006	Failure of a Batch Service	The AES must guarantee the following after a failure of a batch service: – no batch jobs should be lost;	

Functional Requirements BPM Report	REF: SC10-QTM011-DLV-011-5.5-49-1-1
EU Customs Functional Requirements BPM Report for Automated Export System (AES)	
ANNEX 3: REQUIREMENTS	

		<ul style="list-style-type: none"> – recovery mechanism for batch jobs that were in progress at the moment of a failure. This might be either automated or manual process. 	
AES_AVA_0007	Failure of Asynchronous CCN Communication Component	<p>The AES must guarantee the following after a failure of the asynchronous CCN communication component:</p> <ul style="list-style-type: none"> – no message should be lost; – CCN messages and JMS messages must remain in a consistent state; – no duplicate delivery of the same message after a failure; – ability to process queued CCN messages right after a recovery; – continued reprocessing of CCN messages that were in progress at the moment of a failure, i.e. failed messages need to be re-processed. 	
AES_AVA_0008	Failure of Database	<p>The AES must guarantee the following after a recovery of database:</p> <ul style="list-style-type: none"> – no loss of transactional data; – business data must remain in consistent state; – immediate availability of database after a failure; – no impact on application server components, i.e. transparent failover is required. 	
AES_AVA_0009	Failure of HTTP Communication of CCN	<p>The AES must guarantee the following after a failure of HTTP communication over CCN:</p> <ul style="list-style-type: none"> – Ability to process a new request right after a failure; – Continued processing of all user requests that may have been initiated before a failure, i.e. transparent failover to another application server is required, without need to re-login and re-submit of the request; – Failover and/or load balancing of this component must be transparent to the CCN. 	
AES_AVA_0010	Hot Deployment Support	<p>The TA must provide means for application hot deployment support, meaning that installation of a new application version will not result in application down time.</p>	
AES_AVA_0011	Trade Availability Requirement	<p>The maximum availability that application for the trader might require and hence the maximum availability that the TA has to enable is 99% for a 24/7 period. Initial accepted application availability is 99.9% during business hours and 98% outside business hours, and it should evolve to target availability 99.9% 24/7.</p>	
AES_AVA_0012	Asynchronous Layer	<p>At the asynchronous layer the AES must guarantee the following after a failure:</p> <ul style="list-style-type: none"> – no message should be lost; – ability to process queued messages right after a failure; – continued processing of messages that were in progress at the moment of a failure, i.e. failed messages need to be 	

		re-processed.	
AES_AVA_0013	Minimal Manual Intervention in Recovery	After a partial or a total failure of an internal or external component the AES must be able to recover. The manual intervention must be minimal.	
AES_AVA_0014	Presentation Layer	The AES must guarantee at the presentation layer the continued processing of all user requests that may have been initiated before the failure, i.e. transparent failover is required, without a need to re-login and re-submit of the request.	
AES_AVA_0015	Availability Requirement for Customs Office AES	The initially accepted application availability is 99.9% during business hours and 98% outside business hours, and it should evolve to target availability 99.9% 24/7.	
AES_AVA_0016	Periodic Maintenance Downtime	The AES must be designed in a way so that it does not need periodic maintenance that results in significant downtime.	

Table 4: Availability Requirements

2.4. Data Integrity Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_DIN_0001	Administrator Inspection	The messages that could not be processed must be available to the administrator for inspection. After the inspection the administrator can decide to retry or discard the message.	
AES_DIN_0002	Data Consistency	The AES must preserve the consistency of all data. All data must be stored persistently using transactions.	
AES_DIN_0003	Data Protection	The AES must protect the data against modification and loss during transfer between the client part and the server part and when exchanging data with other systems.	
AES_DIN_0004	Duplicate Message Handling	Messages must be delivered exactly once. Due to CCN and the client, it is possible to receive duplicate messages which should be handled by the application.	

Table 5: Data Integrity Requirements

2.5. Implementation Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_IMP_0001	Automated Build of Delivery Package	Build of the delivery package must be fully automated and include following steps: – a source code and other artefacts checkout from the source control system; – a source code build; – a delivery package creation. Ideally, it must be possible to automatically test the package (i.e. verify that it is possible to create installation	

		from the delivery).	
AES_IMP_0002	Automated Installation Procedure	The AES installation procedure must be fully automated.	
AES_IMP_0003	Delivery Package of Release	As a result of new application release, a delivery package must be produced. The delivery package includes application source code, all third party libraries and additional files required to build installation package. It also contains all application documentation. The structure of the delivery package must be common across applications.	
AES_IMP_0004	DG TAXUD Testing Process	The conformance testing process of DG TAXUD must be followed.	
AES_IMP_0005	Identification of Exact Version	It must be possible to identify the exact version (including hot fix) of the AES during the whole deployment lifecycle: – a delivery package; – an installation package; – a deployed application.	
AES_IMP_0006	Installation Package	As a result of the AES build, installation package must be produced. The Installation package contains artefacts ready to be installed on an environment.	
AES_IMP_0007	Smoke Test Scenarios	Smoke test scenarios must be 100% automated. Smoke tests are a subset of the test cases that cover the most important functionalities of the AES.	
AES_IMP_0008	Unit Testing	Unit tests must be run during delivery package build and unit test report must be automatically generated. Unit test coverage goal is application specific, but it should be avoided setting goals lower than 80%.	
AES_IMP_0009	Integration on Test Environment and Automated Test Execution	A continuous integration practice must be applied for the AES installation on the test environment and automated test execution.	

Table 6: Implementation Requirements

2.6. Infrastructure Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_INF_0001	Security and Confidentiality of Traffic between Client and Server Part	The security and confidentiality of the traffic between the client part and the server part of the AES must be ensured by the Common Communication Network (CCN) and by the EC's internal network.	
AES_INF_0002	Traffic CDCO - other CDCOs	All traffic between the National AES systems must be performed through the CCN or through the EC's internal network.	

Table 7: Infrastructure Requirements

2.7. Installability Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_INS_0001	Continuous Integration Practice	Continuous integration practice must be applied for AES installation package build.	

Table 8: Installability Requirements

2.8. Interface Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_ITF_0001	Interface with Customs Decisions System	The AES must have an interface with the Customs Decisions System to check whether declared authorisations: -match with the declarant; -match with the declared goods; -are valid; -are active.	
AES_ITF_0002	Interface with National Risk Systems	The AES must interface with the National Risk System of the respective MS.	
AES_ITF_0003	Interface with EOS-EORI	The system must be able to interface with the EORI-EOS system to retrieve the details of the economic operator. Furthermore, EORI numbers submitted by economic operators will be automatically validated against the EOS-EORI system.	
AES_ITF_0004	Interface with EOS-AEO	The AES must interface with EOS-AEO to check the validity of AEO certificates	
AES_ITF_0005	Interface with EMCS	AES must interface with EMCS to be able to retrieve e-AD from the MSA of Destination/Export and to be able to notify when goods are release/not released for export.	

Table 9: Interface Requirements

2.9. Logging Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_LOG_0001	Authentication Log	The AES must provide possibility to log all authentication or authorisation attempts whether they are successful or not.	
AES_LOG_0002	Availability Period of Technical Logs	Technical logs must be available for configurable period of time.	
AES_LOG_0003	Central Storage of Logs	The logging component must support centralised storage for logs.	
AES_LOG_0004	Dump Messages	TA must provide possibility to dump the messages. There is no need to filter messages based on the origin or type, all exchanged messages are dumped.	

Table 10: Logging Requirements

2.10. Monitoring Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_MON_0001	Integration with External Monitoring Component	The AES must enable integration with the external (infrastructure provider) monitoring component currently used at DG TAXUD.	
AES_MON_0002	Metrics	<p>The following metrics must be reported:</p> <ul style="list-style-type: none">– Common metrics exposed by the application server such as CPU load, heap usage, IO activity, JMS Queue (number of pending messages), JDBC data sources (number of free connections), number of threads;– Health checks where components should check that they are able to perform the necessary functions. The TA must provide framework to simplify implementation of health checks on the component level. Exact checks are component specific and should be defined at design time of the component. <p>-> How often/frequent?</p>	

Table 11: Monitoring Requirements

2.11. Ownership of Assets Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_OOA_0001	Data Masking Strategies	<p>Data masking strategies and techniques must be used for production data before they are sent for use in non-production environments.</p> <p>Data masking strategies and techniques will obscure or depersonalize specific data within a database table or a flat file ensuring data security is maintained and customer information is not leaked outside of authorised environments. The data masking algorithms are applied across multiple tables, applications and environments so referential and business integrity will always be maintained. This allows testing and development teams to carry out project work safely and efficiently.</p>	
AES_OOA_0002	Data Ownership	<p>The owner of data is holding the responsibility of the data quality.</p> <p>The EC is normally owner of all reference data, while an MS is normally owner of all business data originating from those MS:</p> <ul style="list-style-type: none">- The reference data are owned by DG TAXUD and can only be changed by DG TAXUD users;- The data exchanged between the MS is owned by the MS that created it.	

Table 12: Ownership of Assets Requirements

2.12. Performance Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_PER_0001	Performance Requirements	<p>The AES must strive for the lowest response times, which are defined as follows: when measured in the standard stress test configuration, AES response time with respect to requests from all users shall not exceed 2 seconds.</p> <p>Longer response time periods may be deemed acceptable for some types of operations (e.g., report generation, extractions, and complex queries). Each case of such ‘anticipated’ longer response time shall be agreed upon and documented as an exception.</p>	

Table 13: Performance Requirements

2.13. Scalability Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_SCA_0001	Maximum Size of Messages Exchanged via CCN	The AES must be designed to support maximal size of messages exchanged via CCN queues. This is a configurable value, so there should be no dependency on the current maximal size of the message.	
AES_SCA_0002	Multiple Users	The AES must allow concurrent users to work, while guaranteeing the consistency of the data. An action by a user should not invalidate another user's data without at least notification.	
AES_SCA_0003	Scalable Architecture	<p>The AES must be architected to horizontally scale including increased number of users and increased transaction and data volume without changing technical architecture (the underlying infrastructure architecture will probably change).</p> <p>The amount of messages exchanged via CCN increases by 30% annually. This statement does not imply that the architecture must support 30% annual increase because messages are distributed across applications, environments, etc. But it indicates that the architecture must be scalable.</p>	
AES_SCA_0004	Split Messages that Exceed Size	The AES must be able to split messages sent to the CCN if a size limit is exceeded. The size limit is equal to the CCN or NA message size limit, depending which limit is lower.	

Table 14: Scalability Requirements

2.14. Security and Data Protection Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
----------------	------------------	-------------------------	--------------

AES_SEC_0001	Compliance	<p>The AES must provide support to applications in order to comply with the TEMPO security policy</p> <p>Compliance with the TEMPO security policy implies that the AES and the data exchanged between the national IT systems complies with the applicable directives, regulations and decisions related to security and data protection, i.e.:</p> <ul style="list-style-type: none">– Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data;– Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data;– Council decision No 2001/264/EC of 19 March 2001 adopting the Council's security regulations;– Commission decision C(2006) 3602 of 16 August 2006 concerning the security of information systems used by the European Commission	
--------------	------------	--	--

Table 15: Security and Data Protection Requirements

2.15. Usability Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_USE_0001	Multiple Users	The new system must allow several users to work simultaneously, while guaranteeing coherence.	
AES_USE_0002	Textual Data	It must be possible to enter textual data in the interactive client any present or future official language of the EU using [UTF-8] encoding.	
AES_USE_0003	User Interface Uniformity	User Interface should be uniform for the end users (not necessary for administrators).	

Table 16: Usability Requirements

2.16. Volumetric Requirements

REQUIREMENT ID	REQUIREMENT NAME	REQUIREMENT DESCRIPTION	RELATED TEST
AES_VOL_0001	Number of IEs	The AES must support up to x IEs per business day.	

Table 17: Volumetric Requirements
